

Tips for Selecting Our Mittens

Recycled wools, when felted, are like snowflakes. Sizes may vary slightly from pair to pair due to the unique character of each wool.

All sweaters have different thicknesses, so our products are categorized into light, average or heavy weight.

Women's mittens measure 9-10 inches in total length from cuff to tip. Thumb length is about 2.5 inches and width across the knuckles is about 3.5 inches. "Lighter Weight" mittens tend to be roomier than "Heavy Weight" mittens.

Men's mittens measure about 11 inches in total length from cuff to tip. Thumb length is about 3 inches and width across the knuckles is about 4.5 inches.

Fingerless mittens measure about 9-10 inches in total length. The cuff is longer than the cuff in traditional mittens, and they end at the knuckle of the middle finger. The thumb ends at the knuckle. Again, length may vary slightly.

Scarves measure 52-55 inches long and are light or average weight.

Hats can be Unisex but we design them with women in mind. They are a good fit for a head that has a 21-23 inch circumference.

We hope this helps you find the perfect pair!
