

Tips for Selecting Our Mittens

Our mittens are made from felted, recycled wool sweaters. Felting wool is not an exact science, therefore each pair may vary slightly in size.

Women's mittens measures 9-10 inches in total length from cuff to tip. We have sized each pair as "Small/Medium" (closer to 9 inches in length) and "Large" (closer to 10 inches in length). Thumb length is about 2.5 inches. Width across the knuckles is about 3.5 inches, with "Small/Medium" mittens having a more snug fit than "Large" mittens.

Men's mittens measure about 11 inches in total length from cuff to tip. We have sized each pair as "XL". Thumb length is about 3 inches and width across the knuckles is about 4.5 inches.

All sweaters have different thicknesses, so mittens are categorized into light weight, average weight and heavy weight.

We hope this helps you find the perfect pair!
